We are pleased that Bank of Hawaii met its key goals. As we enter 2007 and begin to execute our next plan, the Hawaii economy appears strong and we believe our company is well positioned to continue building on its many successes."

### **Financial Highlights**

Net interest income, on a taxable equivalent basis, for the fourth quarter of 2006 was \$100.4 million, down \$3.2 million from net interest income of \$103.6 million in the fourth quarter of 2005 and down \$0.1 million from net interest income of \$100.5 million in the third quarter of 2006. Net interest income, on a taxable equivalent basis, for the full year of 2006 was \$403.3 million, down \$4.2 million from \$407.5 million in 2005. Analyses of changes in net interest income for the full year are included in Table 6.

The net interest margin was 4.15 percent for the fourth quarter of 2006, a 28 basis point decrease from 4.43 percent in the fourth quarter of 2005 and a 5 basis point decrease from 4.20 percent in the third quarter of 2006. The net interest margin for the full year of 2006 was 4.25 percent, a 13 basis point decrease from 4.38 percent in 2005. The decrease was primarily due to the effect of the inverted yield curve in the second half of 2006 and shifts in the funding mix.

Results for the fourth quarter of 2006 included a provision for credit losses of \$3.1 million compared to \$1.6 million in the fourth quarter of 2005 and \$2.8 million in the third quarter of 2006. The provision for credit losses for the full year of 2006 was \$10.8 million compared to \$4.6 million in 2005.

Noninterest income was \$53.5 million for the fourth quarter of 2006, an increase of \$2.7 million or 5.3 percent compared to noninterest income of \$50.8 million in the fourth quarter of 2005 and down \$3.4 million or 5.9 percent compared to noninterest income of \$56.9 million in the third quarter of 2006. The decrease compared to the previous quarter was largely due to a seasonal reduction in insurance commissions. Noninterest income for the full year of 2006 was \$216.2 million, up \$6.9 million or 3.3 percent from noninterest income of \$209.3 million in 2005.

Noninterest expense was \$81.6 million in the fourth quarter of 2006, down \$1.6 million or 1.9 percent from noninterest expense of \$83.2 million in the same quarter last year and up \$1.8 million or 2.2 percent from \$79.8 million in the previous quarter. Results for the fourth quarter of 2006 included contributions of \$1.5 million to the Bank of Hawaii Charitable Foundation. Fourth quarter noninterest expense also includes an accrual of \$1.5 million for bonuses to some employees not participating in other incentive programs due to the successful completion of the 2004 - 2006 Strategic Plan. An analysis of salary and benefit expenses is included in Table 7. Noninterest expense for the full year of 2006 was \$321.0 million, down \$6.7 million or 2.0 percent from noninterest expense of \$327.6 million in 2005.

The efficiency ratio for the fourth quarter of 2006 was 53.08 percent, down from 53.92 percent in the same quarter last year and up from 50.75 percent in the previous quarter. The efficiency ratio for the full year of 2006 was 51.87 percent, an improvement from 53.15 percent during the full year of 2005.

The effective tax rate for the fourth quarter of 2006 was 26.19 percent compared to 35.57 percent during the same quarter last year and 37.14 percent in the previous quarter. The lower rate in the fourth quarter of 2006 was primarily due to accrual adjustments for tax matters that were resolved in the fourth quarter. The effective tax rate for the full year of 2006 was 37.17 percent compared to 36.11 percent during 2005. The increase from prior year was due to the second quarter 2006 tax charge related to a change in tax legislation.

The Company's business segments are defined as Retail Banking, Commercial Banking, Investment Services Group, and Treasury and Other Corporate. Results are determined based on the Company's internal financial management reporting process and organizational structure. Selected financial information for the business segments is included in Tables 11a and 11b.

#### Economic Update

At the end of 2006, the Hawaii economy was generally in strong condition. Inflation moderated in the second half of 2006 due to lower energy prices and stable home prices. Looking forward to 2007, most economic indicators will show modest improvements as capacity constraints affecting tourism and the workforce will limit economic growth. Personal income growth should improve slightly, although inflation is expected to exceed national levels. Housing prices are expected to remain stable as new home building slows. Commercial real estate demand is expected to remain strong.

#### **Business Outlook**

In 2001, the Company announced a three-year plan designed to refocus on maximizing shareholder value over time, which continues to be our governing objective. That plan was successfully completed in 2003. A new three-year plan for 2004 - 2006 was announced in 2004 which continued to build on the winning strategy of the previous plan. The key elements were to accelerate revenue growth, better integrate business segments, develop

the management team, improve efficiency, and maintain a discipline of dependable risk and capital management. The 2004 - 2006 Plan was successfully completed in 2006.

The Company's Plan for 2007 and beyond builds on the themes that were prominent in the 2004 - 2006 Plan. The 2007+ Plan emphasizes growth in revenues, integration of service delivery and business units, development of people, enhancement of the Bank of Hawaii brand, and discipline in managing risk and financial performance. The 2007+ Plan does not contemplate expansion beyond the Company's current footprint.

"Given the solid performance of Bank of Hawaii in the last two years, we anticipate that our shareholders expect a plan that emphasizes consistency," said Mr. Landon. "Our 2007+ Plan was prepared by a team of fifteen of the Company's best leaders. Our planning team evaluated a full range of strategic alternatives and developed a solid plan."

The 2007+ Plan is based on moderate growth in revenue and consistent positive operating leverage. The 2007+ Plan is based on forecasts of a "flat" yield curve continuing well into 2007. Anticipated operating results include an annual return on assets above 1.7 percent, a return on equity above 25 percent, and an efficiency ratio approaching 50 percent, based on a stable economy and a return to a more traditional interest rate environment. The 2007+ Plan contemplates some increase in loan losses. The Company does not expect to provide specific earnings expectations in the future. The 2007+ Plan will be reevaluated periodically and updated as market events dictate.
