- **Diluted Earnings Per Share \$0.87**
- **Net Income \$34.7 Million**
- **Company Adopts CECL and Records \$33.6 Million Provision**
- **Board of Directors Declares Dividend of \$0.67 Per Share**

FOR IMMEDIATE RELEASE

HONOLULU, HI (April 20, 2020) -- Bank of Hawaii Corporation (NYSE: BOH) today reported diluted earnings per share of \$0.87 for the first quarter of 2020, a decrease from diluted earnings per share of \$1.45 in the previous quarter and \$1.43 in the same quarter last year. Net income for the first quarter of 2020 was \$34.7 million compared with net income of \$58.1 million in the fourth quarter of 2019 and \$58.8 million in the first quarter of 2019. The decrease from the previous quarter is the result of an increased provision expense of \$33.6 million compared with \$4.8 million in the previous quarter and \$3.0 million in the first quarter last year. The increase in the provision was related to changes in economic conditions driven by the impact of COVID-19 and considered the effect of significantly slower economic growth and higher unemployment in Hawaii partially offset by the benefits of government stimulus programs.

"We were pleased with our overall financial performance during the first quarter of 2020 despite the challenges related to COVID-19," said Peter S. Ho, Chairman, President, and CEO. "Our strong balance sheet includes a high-quality securities portfolio, good asset quality, high levels of liquidity, and a solid capital base that will allow us to provide the financial support to our customers and community needed to emerge from the COVID-19 crisis."

The return on average assets for the first quarter of 2020 was 0.77 percent compared with 1.29 percent during the previous quarter and 1.38 percent in the same quarter last year. The return on average equity for the first quarter of 2020 was 10.64 percent compared with 17.84 percent in the fourth quarter of 2019 and 18.81 percent in the first quarter of 2019.

Financial Highlights

Net interest income, on a taxable-equivalent basis, for the first quarter of 2020 was \$126.3 million, an increase of \$2.1 million from \$124.2 million in the fourth quarter of 2019 and up \$0.5 million from \$125.8 million in the first quarter of 2019. The net interest margin was 2.96 percent for the first quarter of 2020, up 1 basis point compared with 2.95 percent in the previous quarter and down 16 basis points from 3.12 percent in the first quarter last year. Analyses of the changes in net interest income are included in Tables 8a and 8b.

Results for the first quarter of 2020 included a provision for credit losses of \$33.6 million. The provision under CECL is reflective of the Company's credit risk profile and the future economic outlook and forecasts. Upon adoption of CECL, the Company recorded a \$1.7 million decrease to the allowance for loan and lease losses on January 1, 2020 that reflected a generally stable asset quality and economic outlook. At that time, the COVID-19 pandemic was not yet estimated to have the significant impact that ultimately transpired in the latter half of the current quarter.

Noninterest income was \$46.1 million in the first quarter of 2020, a decrease of \$1.6 million compared with \$47.7 million in the fourth quarter of 2019 and an increase of \$2.4 million compared with \$43.7 million in the first quarter of 2019. There were no significant items in noninterest income during the first quarter of 2020. Noninterest income in the fourth quarter of 2019 included a gain of \$3.8 million related to the early buyout of a leveraged lease. Noninterest income in the first quarter of 2019 included a \$1.4 million commission related to insurance products offered through a third-party administrator. Adjusted for significant items, the increase in noninterest income compared with the fourth quarter of 2019 and the first quarter last year was largely due to significant growth in customer derivative activity.

Noninterest expense was \$96.3 million in the first quarter of 2020, an increase of \$3.2 million compared with \$93.1 million in the fourth quarter of 2019 and an increase of \$3.2 million from \$93.1 million in the same quarter last year. Noninterest expense in the first quarter of 2020 included seasonal payroll expenses of approximately \$3.1 million and severance expenses of \$4.7 million that were partially offset by the elimination of corporate incentive accruals. There were no significant items in noninterest expense during the fourth quarter of 2019. Noninterest expense in the first quarter of 2019 included seasonal payroll expenses of approximately \$2.7 million. An analysis of noninterest expenses related to salaries and benefits is included in Table 9.

The efficiency ratio during the first quarter of 2020 was 55.96 percent compared with 54.26 percent in the previous quarter and 55.22 percent in the same quarter last year.

The effective tax rate for the first quarter of 2020 was 17.68 percent compared with 21.15 percent in the previous quarter and 18.85 percent during the same quarter last year. There were no significant items impacting the tax rate during the first quarter of 2020 or the fourth quarter of 2019. The first quarter of 2019 included tax benefits of \$1.9 million related to a commercial customer's exercise of an early-buy-out option on a leveraged lease.

The Company's business segments are defined as Consumer Banking, Commercial Banking, and Treasury & Other. Results for the business segments are determined based on the Company's internal financial management reporting process and organizational structure. Selected financial information is included in Table 13.
