- Diluted Earnings Per Share Increases to \$0.61
- Net Income Increases to \$36.7 Million for the Quarter
- Board of Directors Increases Quarterly Dividend 58% to \$0.30 Per Share

Bank of Hawaii Corporation (NYSE:BOH) today reported diluted earnings per share of \$0.61 for the third quarter of 2003, up 27.1 percent from diluted earnings per share of \$0.48 in the second quarter of 2003 and up 41.9 percent from \$0.43 in the third quarter last year. Net income for the quarter was \$36.7 million, up 22.2 percent from \$30.0 million in the previous quarter and up 21.5 percent from \$30.2 million in the same quarter last year.

The return on average assets for the third quarter of 2003 was 1.53 percent, up from 1.27 percent in the second quarter of 2003 and up from 1.22 percent in the third quarter of 2002. The return on average equity was 16.69 percent during the quarter, up 29.1 percent from 12.93 percent in the previous quarter and up 60.5 percent from 10.40 percent in the same quarter last year.

"I am pleased by the Company's third quarter financial results," said Michael E. O'Neill, Chairman, CEO and President. "Our credit quality measures continued to improve, our margin increased, total revenue was up and our expenses are coming down. The Hawaii economy is strengthening and, importantly, our businesses are growing. This gives us the confidence to increase our quarterly dividend from \$0.19 per share to \$0.30 per share."

For nine months ended September 30, 2003, net income was \$96.5 million, up \$4.2 million or 4.6 percent from net income of \$92.3 million for the same period last year. Diluted earnings per share were \$1.56 for the first nine months of 2003, up 23.8 percent from diluted earnings per share of \$1.26 for the comparable period last year. The year-to-date return on average assets was 1.37 percent, up from 1.22 percent for the same nine months in 2002. The year-to-date return on average equity was 13.95 percent, up from 10.10 percent for the nine-month period ended September 30, 2002.

Financial Highlights

Net interest income for the third quarter of 2003 on a fully taxable equivalent basis was \$91.1 million, up \$0.6 million from the second quarter of 2003 and down \$1.1 million from net interest income of \$92.2 million in the third quarter of 2002. The decrease in net interest income from the previous year was largely due to reductions in interest rates. An analysis of the change in net interest income is included in Table 6.

The net interest margin was 4.15 percent for the third quarter of 2003, a 3 basis point increase from 4.12 percent in the previous quarter and a 12 basis point increase from 4.03 percent in the same quarter last year.

The Company did not recognize a provision for loan and lease losses during the third quarter of 2003 and has not recorded a provision for the last five quarters. The allowance for loan and lease losses was reduced \$5.3 million from June 30, 2003, which equaled the amount of net charge-offs for the third quarter of 2003.

Non-interest income was \$53.8 million for the quarter, an increase of \$3.1 million or 6.0 percent compared to non-interest income of \$50.7 million in the second quarter of 2003. This improvement was primarily due to a prepayment penalty on a commercial real estate loan and higher insurance income. Non-interest income was up \$6.8 million, or 14.4 percent from non-interest income of \$47.0 million in the third quarter of 2002. The improvement from the prior year quarter was largely due to higher levels of service charge and fee income, growth in insurance revenue and increased mortgage banking income.

Non-interest expense was \$88.9 million in the third quarter of 2003, including \$4.4 million in systems replacement costs. Non-interest expense for the second quarter of 2003 included \$10.1 million in systems replacement costs. Excluding these costs, non-interest expense was \$84.5 million in the third quarter of 2003, down \$0.8 million compared to the previous quarter as reductions in salary and equipment expenses related to the systems replacement project were partially offset by a contribution to the Bank of Hawaii Charitable Foundation. Non-interest expense for the third quarter of 2002 included \$6.6 million in systems replacement costs. Excluding these costs, non-interest expense decreased \$0.6 million from the same quarter last year.

The efficiency ratio was 61.3 percent for the third quarter of 2003. Excluding systems replacement costs, the efficiency ratio was 58.3 percent, a significant improvement compared to 60.4 percent in the previous quarter and 61.2 percent in the same quarter last year. For the nine-month period ended September 30, 2003, the efficiency ratio, excluding systems replacement and net restructuring costs was 59.9 percent compared to 61.7 percent in the comparable period last year.

The Company's business segments are defined as Retail Banking, Commercial Banking, Investment Services Group, and Treasury and Other Corporate. Results are determined based on the Company's internal financial management reporting process and organizational structure. Previously reported results have been reclassified to conform to current methodology for allocating interest income among the segments. Business segment performance details are summarized in Tables 11 and 11a.

Asset Quality

Bank of Hawaii Corporation's credit quality continued to improve during the third quarter of 2003. Non-performing assets were \$40.1 million at the end of the quarter, a decrease of \$1.9 million, or 4.5 percent, from non-performing assets of \$42.0 million at the end of the previous quarter.

Non-performing assets declined \$23.2 million, or 36.7 percent compared to \$63.3 million at the end of the third quarter last year. At September 30, 2003 the ratio of non-performing assets to total loans and foreclosed real estate was 0.72 percent compared with 0.77 percent at June 30, 2003 and 1.20 percent at September 30, 2002.

Non-accrual loans were \$31.4 million at September 30, 2003, a reduction of \$1.3 million, or 4.0 percent, from \$32.7 million at June 30, 2003 and down \$14.3 million, or 31.3 percent, from \$45.7 million at September 30, 2002. Non-accrual loans as a percentage of total loans were 0.56 percent at September 30, 2003, down from 0.60 percent at the end of the previous quarter and down from 0.87 percent at the end of the comparable quarter last year.

Net charge-offs during the third quarter of 2003 were \$5.3 million, or 0.38 percent (annualized) of total average loans, up from \$2.1 million, or 0.15 percent (annualized) of total average loans in the second quarter of 2003. The increase in net charge-offs from the previous quarter was largely due to \$3.6 million in net charge-offs, primarily consumer loans, remaining from the Pacific Island branches closed last year. Net charge-offs during the third quarter of 2002 were \$4.5 million, or 0.33 percent (annualized) of total average loans. Net charge-offs for the first nine months of 2003 were \$10.2 million, or 0.25 percent (annualized) of total average loans, a decrease from \$16.1 million, or 0.39 percent (annualized) of total average loans in the comparable period last year.

The allowance for loan and lease losses was \$132.7 million at September 30, 2003. The ratio of the allowance for loan and lease losses to total loans was 2.38 percent at September 30, 2003 down from 2.52 percent at June 30, 2003 and down from 2.94 percent at September 30, 2002.

Concentrations of credit exposure to selected components of the portfolio are summarized in Table 7.

Other Financial Highlights

Total assets were \$9.4 billion at September 30, 2003, down slightly from total assets of \$9.5 billion at December 31, 2002 and down from total assets of \$9.7 billion at September 30, 2002. Total assets were down \$180 million from June 30, 2003. The decrease from the prior periods was largely due to net loan growth that was offset by reductions in short-term investments as excess liquidity was utilized for share repurchases.

Total deposits at September 30, 2003 were \$7.1 billion, up \$182 million from December 31, 2002 and up \$474 million from September 30, 2002 primarily due to continued growth in demand and savings deposits. Total deposits decreased slightly from June 30, 2003.

During the third quarter of 2003, Bank of Hawaii Corporation repurchased 3.1 million shares of common stock at a total cost of \$103.5 million under the share repurchase program. The average cost per share was \$33.85 during the quarter. From the beginning of the share repurchase program in July 2001 through September 30, 2003, the Company had repurchased a total of 28.2 million shares and returned a total of \$790.8 million to the shareholders at an average cost of \$28.02 per share. Through October 24, 2003, the Company repurchased an additional 0.2 million shares of common stock at a cost of \$35.62 per share. Remaining buyback authority, which was increased in September 2003, was \$202.7 million at October 24, 2003.

The Company's capital and liquidity remains exceptionally strong. At September 30, 2003 the Tier 1 leverage ratio was 8.52 percent compared to 9.29 percent at June 30, 2003 and 11.07 percent at September 30, 2002.

Dividend Increase

The Company's Board of Directors declared an increased quarterly cash dividend of \$0.30 per share on the Company's outstanding shares. The dividend will be payable on December 12, 2003 to shareholders of record at the close of business on November 21, 2003.

Information Technology Systems Replacement Project

Bank of Hawaii Corporation completed the conversion of its core computer hardware and software systems to the Metavante platform on July 7, 2003 and has been successfully operating on Metavante since the conversion. In connection with this project, the Company incurred transition charges of \$35.5 million over the five-quarter conversion period that ended during the third quarter of 2003 and all costs have been incurred as of September 30, 2003. Costs totaling \$4.4 million were recognized during the third quarter of 2003. The lower cost platform is expected to provide annual cost savings of over \$17 million compared to second quarter 2002 technology expense levels. Additional details on this project may be found in Table 10.

Economic Update

The Hawaii economy remained strong during the third quarter of 2003. The construction and real estate investment sectors continued to surge over the summer months, especially in the neighbor island residential markets. Tourism, as measured by passenger arrivals, also increased during the quarter. August 2003 was a record month for Hawaii tourism. Hawaii's seasonally-adjusted unemployment increased slightly to 4.3 percent in August, while nonagricultural payrolls rose more than 2 percent in August 2003 from the prior year level. For more economic information, visit the Company's web site <http://www.boh.com/econ/>.

Earnings Outlook

The Company now believes that its earnings for 2003 should exceed the previously published earnings guidance of \$131 million. Based on current conditions, the Company does not expect to record a provision for loan and lease losses in 2003. However, the actual amount of the provision for loan and lease losses depends on determinations of credit risk that are made near the end of each quarter. Earnings per share and return on equity projections continue to be dependent upon the terms and timing of share repurchases.
