Net interest income in the second quarter of 2020 included an interest recovery of \$2.9 million that increased the margin by 7 basis points. Net interest income, on a taxable equivalent basis, for the nine-month period in 2020 was \$377.8 million, an increase of \$2.1 million compared with net interest income of \$375.7 million for the same period in 2019. Analyses of the changes in net interest income are included in Tables 8a, 8b and 8c.

The decrease is largely due to lower rates and higher levels of liquidity due to the strong deposit growth. The net interest margin for the nine-month period in 2020 was 2.82 percent compared with the net interest margin of 3.05 percent for the same nine-month period last year.

Results for the third quarter of 2020 included a provision for credit losses of \$28.6 million compared with \$40.4 million in the previous quarter and \$4.3 million in the same quarter last year. Adjusted for the sale of the Visa shares, the increase in noninterest income compared to the prior quarter was primarily due to higher fee income. The decline in noninterest revenue compared to the third quarter last year is due to lower fee income resulting from decreased customer and visitor activity related to the COVID-19 pandemic. Noninterest income for the nine-month period in 2020 was \$139.2 million, an increase of \$3.6 million compared with noninterest income of \$135.6 million for the same period in 2019.
