- Net Income \$34.3 Million
- Board of Directors Declares Dividend of \$0.45 Per Share

FOR IMMEDIATE RELEASE

HONOLULU, HI (October 26, 2015) -- Bank of Hawaii Corporation (NYSE: BOH) today reported diluted earnings per share of \$0.79 for the third quarter of 2015, down from \$0.95 in the second quarter of 2015 and \$0.95 in the third quarter of 2014. Net income for the third quarter of 2015 was \$34.3 million, down from net income of \$41.2 million in the previous quarter and \$41.8 million in the same quarter last year. The decrease was primarily due to the previously announced impairment charges totaling \$6.5 million, net of tax, related to the decision to dispose of all of its remaining aircraft leases. Table 3b summarizes the components of the impairment charges.

"Bank of Hawaii's operating results were strong in the third quarter of 2015, excluding the one-time impact of the aircraft impairment charges," said Peter S. Ho, Chairman, President and CEO. "Loan balances grew 3.5 percent from the previous quarter and average deposits grew 1.1 percent. Asset quality continued to be strong during the quarter and our core expenses were well controlled."

The return on average assets for the third quarter of 2015 was 0.89 percent, down from 1.10 percent in the previous quarter and 1.15 percent in the same quarter last year. The return on average equity for the third quarter of 2015 was 12.45 percent, down from 15.33 percent for the second quarter of 2015 and 15.57 percent in the third quarter of 2014. The efficiency ratio for the third quarter of 2015 was 65.12 percent compared with 58.16 percent in the previous quarter and 57.74 percent in the same quarter last year. Adjusted for the lease impairment charges, the return on average assets for the third quarter of 2015 was 1.06 percent, the return on average equity was 14.80 percent, and the efficiency ratio was 58.0 percent.

Financial Highlights

Net interest income, on a taxable equivalent basis, for the third quarter of 2015 was \$100.9 million, up slightly from net interest income of \$100.8 million in the second quarter of 2015 and up from net interest income of \$98.3 million in the third quarter of 2014. Net interest income for the nine-month period in 2015 was \$301.4 million compared with net interest income of \$291.6 million for the same period in 2014. Analyses of the changes in net interest income are included in Tables 8a, 8b, and 8c.

The net interest margin was 2.77 percent for the third quarter of 2015, a 4 basis point decrease from the net interest margin of 2.81 percent in the second quarter of 2015, and an 8 basis point decrease from the net interest margin of 2.85 percent in the third quarter of 2014. The net interest margin for the first nine months of 2015 was 2.79 percent compared with 2.86 percent for the same nine-month period last year.

The Company did not record a provision for credit losses during the nine-month period ended September 30, 2015. The first nine months of 2014 included a negative provision for credit losses of \$4.9 million. The negative provision reflected continued strength of the credit risk profile, several large commercial loan recoveries, as well as a reduction of \$2.7 million in the specific reserve related to one commercial client during the third quarter of 2014.

Noninterest income was \$43.2 million in the third quarter of 2015, down from \$45.9 million in the second quarter of 2015 and down from \$45.0 million in the third quarter of 2014. Noninterest income in the third quarter of 2015 included a \$1.0 million estimated loss on the pending sale of an aircraft lease. See Table 3b. Noninterest income in the third quarter of 2014 included a net gain of \$1.9 million resulting from the sale of 23,000 Visa Class B shares. There were no sales of Visa Class B shares in the second or third quarters of 2015. Noninterest income for the nine-months ended September 30, 2015 was \$141.5 million compared with noninterest income of \$134.2 million for the same period in 2014. The increase was primarily due to the timing of Visa Class B shares sales and an increase in mortgage banking income.

Noninterest expense was \$91.9 million in the third quarter of 2015, up from \$83.6 million in the previous quarter and up from \$81.0 million in the same quarter last year. The increase was primarily due to a \$9.5 million impairment of the residual values on aircraft in which the leases have expired. See Table 3b. Noninterest expense for the nine-months ended September 30, 2015 was \$262.4 million, compared with noninterest expense of \$245.7 million for the same period in 2014. The increase was primarily due to the impairment charges, higher separation expense, an increase in compensation related to higher business activity, and an increase in amortization expense related to our solar energy partnership investments. An analysis of noninterest expenses related to salaries and benefits is included in Table 9.
