- Diluted Earnings Per Share \$0.95
- Net Income \$41.8 Million
- Board of Directors Declares Dividend of \$0.45 Per Share

FOR IMMEDIATE RELEASE

HONOLULU, HI (October 27, 2014) -- Bank of Hawaii Corporation (NYSE: BOH) today reported diluted earnings per share of \$0.95 for the third quarter of 2014, up from \$0.94 in the second quarter of 2014, and up from \$0.85 in the third quarter of 2013. Net income for the third quarter of 2014 was \$41.8 million, an increase from net income of \$41.5 million in the previous quarter and \$37.7 million in the same quarter last year.

“Bank of Hawaii Corporation continued to perform well during the third quarter of 2014,” said Peter Ho, Chairman, President, and CEO. “Loan balances grew 2.8 percent from the previous quarter and average deposits grew 1.4 percent. Our margin remained relatively stable as loan growth partially offset the lower interest rate environment. Asset quality continued to be strong during the quarter and our expenses were well controlled.”

The return on average assets for the third quarter of 2014 was 1.15 percent, down slightly from 1.17 percent in the previous quarter and up from 1.09 percent in the same quarter last year. The return on average equity for the third quarter of 2014 was 15.57 percent, down from 15.87 percent for the second quarter of 2014 and up from 15.02 percent in the third quarter of 2013.

For the nine-month period ended September 30, 2014, net income was \$121.9 million, an increase from net income of \$111.4 million for the same period last year. Diluted earnings per share were \$2.75 for the nine-month period in 2014 compared with diluted earnings per share of \$2.50 for the same period in 2013. The 2014 year-to-date return on average assets was 1.15 percent compared with 1.09 percent for the same period in 2013. Financial Highlights

Net interest income, on a taxable equivalent basis, for the third quarter of 2014 was \$98.3 million, up \$1.0 million from net interest income of \$97.3 million in the second quarter of 2014 and up \$4.8 million from net interest income of \$93.5 million in the third quarter of 2013. Net interest income for the nine-month period in 2014 was \$291.6 million compared with net interest income of \$274.3 million for the same period in 2013. Analyses of the changes in net interest income are included in Tables 8a, 8b, and 8c.

The net interest margin was 2.85 percent for the third quarter of 2014, a 1 basis point decrease from the net interest margin of 2.86 percent in the second quarter of 2014, and a 2 basis point increase from the net interest margin of 2.83 percent in the third quarter of 2013. The net interest margin for the first nine months of 2014 was 2.86 percent compared with 2.81 percent for the same nine-month period last year.

The Company recorded a negative provision for credit losses of \$2.7 million in the third quarter of 2014 compared with a negative provision of \$2.2 million in the second quarter of 2014 and no provision recorded in the third quarter of 2013. The negative provision for credit losses for the third quarter of 2014 was primarily due to a reduction in the specific reserve related to one commercial client. The first nine months of 2014 included a negative provision for credit losses of \$4.9 million compared to no provision for the first nine months of 2013. The negative provision for the first nine months of 2014 reflects the continued strength of our credit risk profile, several large commercial loan recoveries, as well as the reduction in the specific reserve related to one commercial client as noted above.

Noninterest income was \$45.0 million in the third quarter of 2014, an increase of \$0.5 million compared with \$44.5 million in the second quarter of 2014, and a decrease of \$0.1 million compared with \$45.1 million in the third quarter of 2013. Noninterest income in the third quarter of 2014 included a net gain of \$1.9 million resulting from the sale of 23,000 Visa Class B shares (9,478 Class A equivalents). Noninterest income in the second quarter of 2014 included a gain of \$2.0 million from the sale of 23,500 Visa Class B shares. The Company also contributed 5,700 Visa Class B shares (2,349 Class A equivalents) to the Bank of Hawaii Foundation during the third quarter of 2014. The contribution of Visa shares to the Bank of Hawaii Foundation has no impact on noninterest expense; however, the contributions favorably impact the effective tax rate. As of September 30, 2014, the Company has 424,214 Visa Class B shares remaining (174,819 Class A equivalents). Noninterest income for the nine-months ended September 30, 2014 was \$134.2 million, a decrease of \$6.7 million compared with noninterest income of \$140.9 million for the same period in 2013. The decrease was primarily due to a reduction of \$10.9 million in mortgage banking income which was partially offset by net gains of \$5.8 million on the sales of Visa Class B shares during the period.

Noninterest expense was \$81.0 million in the third quarter of 2014, essentially flat with the previous quarter, and down \$2.0 million compared with \$83.0 million in the same quarter last year. Noninterest expense for the nine-months ended September 30, 2014 was \$245.7 million, a decrease of \$2.8 million compared with noninterest expense of \$248.5 million for the same period in 2013. An analysis of noninterest expenses related to salaries and benefits is included in Table 9.

The efficiency ratio for the third quarter of 2014 was 57.74 percent, down from 58.38 percent in the previous quarter and 61.01 percent in the same quarter last year. The efficiency ratio for the nine-month period ended September 30, 2014 was 58.88 percent, an improvement from the efficiency ratio of 60.96 percent for the same period last year.

The effective tax rate for the third quarter of 2014 was 32.59 percent compared with 30.86 percent in the previous quarter and 28.91 percent during the same quarter last year. The effective tax rate for the nine-month period ended September 30, 2014 was 30.93 percent compared to 29.99 percent for the same period last year. The lower effective tax rates during 2013 were due to the release of tax reserves and low-income housing and other tax credits.

The Company's business segments are defined as Retail Banking, Commercial Banking, Investment Services, and Treasury & Other. Results are determined based on the Company's internal financial management reporting process and organizational structure. Selected financial information for the business segments is included in Tables 13a and 13b.

Restructured loans and leases not included in non-accrual loans or accruing loans past due 90 days or more were \$45.2 million at September 30, 2014 and primarily comprised of residential mortgage loans with lowered monthly payments to accommodate our borrowers' financial needs for a period of time. More information on non-performing assets and accruing loans and leases past due 90 days or more is presented in Table 11.

Net loans and leases charged off during the third quarter of 2014 were \$0.8 million or 0.05 percent annualized of total average loans and leases outstanding. Loan and lease charge-offs of \$3.7 million during the quarter were partially offset by recoveries of \$2.9 million. The Company recorded a net recovery of loans and leases previously charged off of \$1.9 million during the second quarter of 2014 as loan and lease charge-offs of \$4.0 million were more than offset by recoveries of \$5.9 million. Net charge-offs during the third quarter of 2013 were \$0.9 million or 0.06 percent annualized of total average loans and leases outstanding, and were comprised of \$4.7 million in charge-offs partially offset by recoveries of \$3.8 million. Net charge-offs in the nine-month period ended September 30, 2014 were \$0.2 million, or 0.00 percent annualized of total average loans and leases outstanding compared with net charge-offs of \$5.2 million, or 0.12 percent annualized of total average loans and leases outstanding for the same period in 2013.

The reserve for unfunded commitments at September 30, 2014 was unchanged at \$5.9 million. Details of loan and lease charge-offs, recoveries, and the components of the total reserve for credit losses are summarized in Table 12.

1 Comprised of other revolving credit, installment, and lease financing.

2 We consider all of our residential land loans, which are consumer loans secured by unimproved lots, to be of higher risk due to the volatility in the value of the underlying collateral.

3 Higher risk home equity loans are defined as those loans originated in 2005 or later, with current monitoring credit scores below 600, and with original loan-to-value ratios greater than 70%.

4 We consider all of our air transportation leases to be of higher risk due to the weak financial profile of the industry.
