### FOR IMMEDIATE RELEASE

HONOLULU, HI (April 26, 2021) -- Bank of Hawaii Corporation (NYSE: BOH) today reported diluted earnings per share of \$1.50 for the first quarter of 2021, compared with diluted earnings per share of \$1.06 in the previous quarter and \$0.87 in the same quarter last year. Net income for the first quarter of 2021 was \$59.9 million compared with net income of \$42.3 million in the fourth quarter of 2020 and \$34.7 million in the first quarter of 2020.

"We are pleased with our financial performance during the first quarter of 2021," said Peter Ho, Chairman, President, and CEO. "Our balance sheet remains strong with deposit balances and total assets reaching new record highs, solid asset quality, and high levels of liquidity and capital."

The return on average assets for the first quarter of 2021 was 1.15 percent compared with 0.83 percent during the previous quarter and 0.77 percent in the same quarter last year. The return on average equity for the first quarter of 2021 was 17.65 percent compared with 12.26 percent during the previous quarter and 10.64 percent in the same quarter last year.

### **Financial Highlights**

Net interest income, on a taxable-equivalent basis, for the first quarter of 2021 was \$120.8 million, an increase of \$1.0 million from \$119.8 million in the fourth quarter of 2020 and down \$5.5 million from \$126.3 million in the first quarter of 2020. The net interest margin was 2.43 percent in the first quarter of 2021, a decrease of 5 basis points from 2.48 percent the previous quarter and 53 basis points from 2.96 percent in the same quarter last year. Net interest income in the fourth quarter of 2020 included a charge of \$3.0 million related to an impairment in the residual value of a leveraged lease which had a negative impact of 6 basis points on the net interest margin. The decrease in the net interest margin is largely due to higher levels of liquidity from continued strong deposit growth and lower interest rates. Analyses of changes in net interest income are included in Tables 8a and 8b.

- more -

Results for the first quarter of 2021 included a negative provision for credit losses of \$14.3 million compared with a provision for credit losses of \$15.2 million in the previous quarter and \$33.6 million in the same quarter last year.

Noninterest income was \$43.0 million in the first quarter of 2021 compared with noninterest income of \$45.3 million in the fourth quarter of 2020 and \$46.1 million in the first quarter of 2020. The decrease in noninterest income during the first quarter of 2021 compared with the prior quarter is largely due to a decrease in customer derivative program and mortgage banking income. The decrease in noninterest income compared to the first quarter of 2020 is largely due to a decrease in customer derivative program income and lower service charges on deposit accounts.

Noninterest expense was \$98.9 million in the first quarter of 2021 compared with noninterest expense of \$98.7 million in the fourth quarter of 2020 and \$96.3 million in the first quarter of 2020. Noninterest expense in the first quarter of 2021 included seasonal payroll expenses of approximately \$2.1 million, charges related to the rollout of contactless cards of \$1.9 million, and separation expenses of \$1.8 million. Noninterest expense in the first quarter of 2021 also included the restoration of corporate incentives that were eliminated in the first quarter of 2020. Noninterest expense in the fourth quarter of 2020 included \$6.1 million in charges related to the decision to permanently close twelve branches and reduce the current number of cash-only ATMs. Noninterest expense in the fourth quarter of 2020 also included a charge of \$0.8 million related to the true-up of amortization on an investment. Noninterest expense in the first quarter of 2020 included seasonal payroll expenses of approximately \$3.1 million and separation expenses of \$4.7 million that were partially offset by the elimination of corporate incentive accruals. An analysis of noninterest expenses related to salaries and benefits is included in Table 9.

The efficiency ratio during the first quarter of 2021 was 60.45 percent compared with 59.88 percent in the previous quarter and 55.96 percent during the same quarter last year.

The effective tax rate for the first quarter of 2021 was 24.09 percent compared with 16.87 percent in the previous quarter and 17.68 percent during the same quarter in 2020. The increase in the effective tax rate for the first quarter of 2021 was primarily due to higher pretax book income in the first quarter of 2021. The fourth quarter of 2020 included a return to provision adjustment of \$1.6 million. There were no significant items impacting the tax rate during the first quarter of 2020.

The Company's business segments are defined as Consumer Banking, Commercial Banking, and Treasury & Other.
